### CRYPTOCURRENCY

We offer all traders the opportunity to trade a wide range of the top ranked digital coins 24/7\*. Today cryptocurrencies have become known to most people as a conventional and popular investment option. The main purpose of this new technology is to allow people to buy, trade, and invest without the need for banks or any other financial institution. Cryptocurrencies are highly volatile and can be profitable to any trader's portfolio.

Cryptocurrencies are not physical coins they are electronic, a digital asset that remains as data. There are several other coins also reaching a high-level market share such as Bitcoin and Bitcoin Cash, Dash, Ripple, Ethereum and Ethereum Classic.

### OIL AND GAS

Surprising as it might be, anyone can invest in the oil market to make a profit. Indeed, the development of online trading platforms has allowed individuals to use their savings to speculate on rising or falling oil prices. To this end, simply choose your method of trading between the CFDs offered by Forex brokers, which are specifically designed for beginners. Invest-oil.co.uk makes a point to explain how these two trading tools work and how best to use them for profit. You have no doubt noticed that, since 2014, the oil prices have fallen greatly. After approaching \$100 per barrel they finally lost nearly 50% of their value. But, as with all financial markets, the oil market is governed by cycles alternating between rising and falling trends. Therefore, the analysts predict a new rising trend shortly that may enable investors to achieve substantial profits. It is therefore judicious to closely monitor the emergence of this new trend to take position over the long term, or take position now using a short term cover. To trade in oil online using CFDs it is strongly recommended to use data from both technical and fundamental analysis.

## FOREX TRADING

Forex is a portmanteau of foreign currency and exchange. Foreign exchange is the process of changing one currency into another currency for a variety of reasons, usually for commerce, trading, or tourism. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the average was more than \$5.1 trillion in daily forex trading volume.

Because of the worldwide reach of trade, commerce, and finance, forex markets tend to be the largest and most liquid asset markets in the world. Market participants use forex to hedge against international currency and interest rate risk, to speculate on geopolitical events, and to diversify portfolios, among several other reasons.
